PROFILE

Final-year software engineering student seeking a 6-month final-year internship (PFE) starting February 2027 in Full Stack Development, DevOps, or Artificial Intelligence. Versatile and rigorous, I design complete technical solutions — from design to deployment — with autonomy.

EDUCATION

Engineering Degree in Software Engineering <i>Faculty of Sciences of Tunis (FST)</i>	09/2024 – Present
Bachelor's Degree in Software Engineering and Information Systems <i>Higher Institute of Information and Communication Technologies (ISTIC)</i>	09/2021 – 05/2024
Baccalaureate in Computer Science <i>Dar Chaabane El Fehri High School</i>	09/2020 – 06/2021

PROFESSIONAL EXPERIENCE

Full-Stack & DevOps Developer — End-of-Year Internship, STB <i>Tunis, Tunisia</i>	06/2026 – 08/2026
- Developed and deployed a banking customer complaints management application in a DevOps environment on Kubernetes. - Built the Angular frontend and a REST API using Clean Architecture (ASP.NET Core). - Containerized with Docker and deployed to Kubernetes via Argo CD (GitOps approach); set up autoscaling, persistent storage, and NetworkPolicies. - Set up a CI pipeline with GitHub Actions and integrated full observability: metrics, logs, and traces (Prometheus, Grafana, Loki, Tempo, OpenTelemetry).	

Technologies: Angular, ASP.NET Core (Clean Architecture), SQL Server, Docker, Kubernetes, GitHub Actions, Argo CD, Prometheus, Grafana, Loki, Tempo, OpenTelemetry.

Full Stack Developer — End-of-Year Internship, STB <i>Tunis, Tunisia</i>	07/2025 – 08/2025
Designed and developed an intelligent web platform for bank card management, with secure operation tracking and OTP validation.	

Technologies: ASP.NET Core (Clean Architecture), Angular, SQL Server.

Full Stack Developer — Final-Year Internship (PFE), Sagemcom <i>Tunis, Tunisia</i>	01/2024 – 05/2024
Developed a secure web portal for centralizing test logs and managing serial numbers and production operations, with action traceability and an interactive Power BI dashboard.	

Technologies: ASP.NET Core, Angular, SQL Server, Power BI.

Full Stack Developer — End-of-Year Internship, Neopolis Development <i>Nabeul, Tunisia</i>	07/2023 – 08/2023
Developed a web application for wiki generation, aimed at simplifying automatic wiki creation and customization.	

Technologies: Angular, Flask, MySQL.

PROJECTS

Plant Disease Detection	04/2026
Tomato disease detection system combining and comparing machine learning models (Random Forest, SVM, KNN) and deep learning models (CNN, MobileNetV2), deployed via API and a web application.	
Technologies: Python, Scikit-learn, TensorFlow/Keras, OpenCV, scikit-image, FastAPI, Streamlit, Docker, Render.	
MLOps: Banking Fraud Detection System	03/2026

- Built a machine learning pipeline for banking fraud detection: data analysis and preprocessing, model comparison (Logistic Regression, Random Forest, XGBoost), hyperparameter optimization, interpretability, and deployment via a containerized FastAPI (Docker).

Technologies: Python, Scikit-learn, Optuna, SHAP, FastAPI, MLflow, Docker, Pandas, NumPy.

Room and Equipment Booking Mobile Application

02/2026 – 03/2026

- Developed a mobile application for booking rooms and equipment at FST, with real-time availability tracking.

Technologies: FastAPI, Flutter, MongoDB.

3-Tier AWS Cloud Architecture

01/2026

- Designed a highly available, secure, and scalable 3-tier AWS cloud architecture, with Docker containerization and ECS orchestration.

Technologies: EC2, ECS, RDS, S3, ALB, CloudWatch, CloudTrail, Docker, Node.js, React, MySQL.

CertiVerse — Decentralized Certification Platform (Blockchain / Web3)

10/2025 – 12/2025

- Decentralized application for issuing and verifying certificates and diplomas on the Ethereum blockchain, ensuring authenticity and instant verification, plus secure, tamper-proof student portfolio management, with online deployment.

Technologies: React, Solidity, Ethereum, Ethers.js, IPFS (Pinata), Vite, Vercel.

"Pour La Forme" Web Application

02/2025 – 03/2025

- Designed and developed an intelligent sports management web platform with a booking system and an AI module for personalized recommendations.

Technologies: Angular, Node.js, Express.js, MongoDB, AI, Docker.

SKILLS

Programming Languages: Java, C, C#, Python, JavaScript

Databases: MySQL, SQL Server, MongoDB

Frameworks: Angular, React, FastAPI, Spring Boot, Flutter, ASP.NET Core, Node.js, Express.js

Machine Learning & Deep Learning: Scikit-learn, TensorFlow, Keras, NumPy, Pandas

Computer Vision: OpenCV, scikit-image

Cloud & DevOps: Git, AWS, Docker, Kubernetes, Argo CD, GitHub Actions, Prometheus, Grafana, Loki, Tempo

Methodologies: Agile/Scrum

LANGUAGES

Arabic: Native language

French: B2 level (Advanced)

English: B1 level (Intermediate)

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — 05/2026
- AWS Academy Graduate – Cloud Foundations, Training Badge — 02/2026
- Big Data Engineer Certificate, IBM — 12/2023

ASSOCIATIONS

- ATIA FST — Active Member (09/2024 – Present)
- IEEE ISTIC — Media Manager (09/2023 – 05/2024)
